Regarding: new CLA rules & **MB Docket No. 07-42**

Dear FCC Commissioners & Staff:

I am a Commercial Leased Access programmer in Oklahoma. I operate two part time channels- they are part time primarily because the costs associated with a full time channel are prohibitive. I get charged more for airing in prime time when more people could watch my locally produced content. Furthermore, the rates I am charged in my two markets seem to vary widely. The new rate structure put forth in the referenced R&O is simple to understand and therefore it is easier to ensure that cable operators are treating CLA programmers in a fair manner.

I also look forward to the new rules because of the requirement to allow me access to program guides. These guides will raise awareness for the local programming my CLA channels provide.

Therefore, I oppose the request for stay filed by the National Cable and Telecommunications Association ("NCTA").

These new rules will better enable me to continue to provide local programming in the markets I serve. Please do not stop or delay the implementation of these new rules.

For the record the channels I operate expressly serve the intentions of Commercial Leased Access. Our shows include, "Historical Tahlequah", "Historical Muskogee", our local Chambers of Commerce each have shows as do our Oklahoma Cooperative Extension services. We cover and promote local events and fundraisers and show local music and art. We are able to support the channels through commercial sponsorships.

If any staff member or commissioner would like to contact me either for the purpose of this "opposition to request to stay" or for any other matter please feel free to do so. After having operated a CLA channel for a year I am a firm believer in the need for local programming and want to participate in any way possible to see that local programming can be seen as new technologies and methods of content delivery emerge.

Sincerely,
Berry Enloe
